

SIDDHARTH SANGOLLI

Hoboken, NJ | ssangoll@stevens.edu | (848) 327-5044

EDUCATION:

Stevens Institute of Technology

Hoboken, NJ

Master of Science in Management Information Systems (Business Intelligence and Analytics)

Visvesvaraya Technological University Bangalore, India

Bangalore, India

Bachelor of Technology in Electronics & Communication Engineering (Computer Networking)

SKILLS:

Tools and Software: MS Office Suite (Excel, Word, PowerPoint), Tableau, RapidMiner, MS Power BI, MS Project, MS Visio, iRise, Confluence.

Programming Languages: Python (NumPy, Pandas, Matplotlib, Seaborn), R, JavaScript.

Technologies: HTML5, CSS3, Bloomberg, Google Analytics, SAS, Jira.

Databases: PostgreSQL, MySQL. MS SQL Server (2000/2005/2008)

Hard Skills: Data Management, Requirements Gathering, Data Interpretation, SDLC, Agile (Scrum) Methodology, Waterfall Methodology, Risk Management, Data Visualization, Use Case Modelling, Data Manipulation, User Stories, Acceptance Criteria, Work Breakdown Structure, GAP Analysis.

Soft Skills: Problem Solving, Detail Oriented, Innovative, Team Player, Leadership, Strategic Planning, Oral/Written Communication, Troubleshooting.

WORK EXPERIENCE:

B2B2C2C

Edison, NJ

Business Analyst

Jun 2024 – Aug 2024

- Organized and led 10+ SME sessions and user interviews to gather and define both functional and non-functional requirements, resulting in a 15% reduction in requirement gaps and improving project scoping accuracy
- Conducted GAP Analysis between current (AS-IS) and future (TO-BE) states, leveraging document analysis and flow diagrams to drive process improvements and identify system enhancements, leading to a 17% improvement in operational efficiency post-implementation
- Authored Business Requirement Documents (BRD) and Functional Requirement Specifications (FRS), outlining project scope, deliverables, and user specifications to ensure alignment with business objectives
- Led JAD sessions, brainstorming workshops, and focus group discussions to elicit requirements from cross-functional teams and SMEs, translating business needs into technical specifications.

Stevens Institute of Technology

Hoboken, NJ

Student Graduate Assistant

Sep 2023 – May 2024

- Conducted data-driven review sessions twice weekly, enhancing student understanding of challenging course material through interactive learning activities
- Analyzed student performance data to tailor guidance for 10 students, collaborating with the Director of Disability Services to optimize learning outcomes and examination processes
- Developed Tableau dashboards to visualize learning progress for students with special needs, facilitating data-driven instructional strategies
- Courses: Integrating Information Technology Systems, Marketing Analytics, Financial Decision Making

Learnmall

Bangalore, India

Data Analyst

Jan 2021 – Jan 2022

- Conducted primary and secondary market research to gather insights on learning preferences and student engagement, leveraged Python's Pandas, NumPy and Matplotlib libraries to enhance customer segmentation by 10%
- Extracted and cleaned data using advanced SQL queries and MS SQL Server to ensure accuracy before integrating it into the website's backend, which improved overall performance by 15%
- Collaborated within Agile (Scrum) teams to drive the website development cycle, spearheading requirements gathering and actively contributing to sprint meetings, which resulted in a 12% boost in user satisfaction
- Performed industry analysis for cost and sensitivity of high-demand and underrepresented courses utilizing Porter's Five Forces Framework, adjusted pricing strategies accordingly, which led to a targeted marketing initiative and boosted web traffic by 38% and customer acquisition by 13%
- Created visually appealing dashboards using Power BI and Tableau to communicate insights regarding website user engagement, helping stakeholders make data-driven decisions.

Bharat Electronics Limited

Bangalore, India

Data Analyst Intern (Navy)

Aug 2020 – Oct 2020

- Investigated data using SQL (data exploration, cleansing, segmentation, advanced filtering, and sorting), and discovered cost-effective alternatives for the manufacturing unit, resulting in a 12% cost deduction
- Spearheaded the use of R for cluster analysis and implemented statistical analysis of customer segments leading to a 10% increase in forecast accuracy
- Advised on solutions, resolved issues, fostered successful relationships with clients through strong communication and problem-solving skills

PROJECT EXPERIENCE:

Supply Chain and Operations - Piko Provisions Expansion (Industry Capstone Project)

Sep 2023 – Dec 2023

- Assessed procurement alternatives and proposed local sourcing, lowered expenses by 15%
- Analyzed supply chain infrastructure and retail channels, modelled a streamlined supply chain, minimizing procurement costs by 9%
- Evaluated distribution networks, reduced transportation costs by 23% using variance analysis, budgeting and risk management
